## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-18 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance: a circuit as claimed, more specifically in combination with: thin-film photosensors and the photo signal being in a no-signal state, an in-range state and a saturated state as claimed, is not disclosed or made obvious by the prior art of record.

Rather, Riedel (U.S. Patent 6,150,124) discloses a low signal state (not a no-signal state), an intermediate state (not an in-range state) and a high signal state (not a saturated state). Riedel also does not disclose thin-film photosensors.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
